Welcome to

Englerth Gardens

Visitors are always welcome here. It is well to see plants in bloom and order for later delivery or pickup. Or if you wish to pick up an order please write or phone it in ahead of time, as we are not always equipped to dig on immediate demand. If you are planning a new garden it would be well to come in and browse several times during the season to see what you can use for continuous bloom.

The Englerths

We are members of the American Hemerocallis Society Growers Association.

Please Read Before Ordering

POSTAGE: All orders for \$5.00 or over will be sent postpaid. With orders for less than that amount please include 50¢ for packing and mailing. No C.O.D. orders, please, as they add much to your cost and ours.

Michigan customers please include 4% sales tax.

We send freshly dug, blooming size plants, guaranteed to be true to name. If they do not arrive in good condition, do not return them, but give them the best possible treatment, and write us at once, indicating adjustment desired. Also, if there should be any error in labeling, let us know as soon as possible.

Daylilies - (Hemerocallis)

The Daylily is the most versatile of perennials, and can be used in all parts of your garden, for bloom all through the growing season. They can furnish shades of yellow, orange and brown with your Iris in late spring. They can be planted all through the perennial border to furnish shades of cream and gold, the sunshine colors, during the entire season. They can make bold splashes of orange, flame and shades of red against evergreens or shubbery where you wish to make an accent point. Or you may have a garden of Daylillies by themselves, in all their lovely shades.

CULTURE: The Daylillies will grow in any good garden soil and are very drought resistant. However, they do appreciate plenty of moisture and nourishment. They will grow and bloom in partial shade, but should have sun for half a day, as too deep shade will cause weak stems and fewer blooms. They should be left undisturbed over a period of years, as they do not give their best performance until the second or third year. So they should be spaced from two to three feet apart to permit increase in size of clumps. Spread the roots out well when planting, and firm the soil down well. Well rotted manure or compost with bone meal will be appreciated if incorporated in the soil while planting, and peat moss is also found to be beneficial.

Unlabeled Daylily Collection

If you are not interested in names but do want Daylily color all through the season, we will send you a collection of 12 fine Daylilies, all different, our selection and unlabeled, postpaid, for \$3.00. If you wish, and so state, you may have these all in shades of cream and yellow for the perennial border--otherwise they will be in a wide range of colors and patterns.

Oriental Poppies

Shipped in August, Sept. and Early October

ORIENTAL POPPIES will thrive in any good well-drained soil. Plant 2 feet apart, and the crowns should be 3 inches below the surface. Prepare the ground deeply to give the roots plenty of room and water well. It is well to hill up slightly for the winter just before the ground freezes so that water will not stand in the crowns. Newly set plants should be mulched with excelsior or straw after the first hard freeze, to prevent heaving. This will not be necessary after the first winter.

Oriental Poppy Collection

Ten mixed Oriental Poppies, unlabeled.
These are choice named varieties that have
lost their labels. Ten for only \$2.00.

We have watched the behavior of two-toned poppies, and do not believe that the colors of bloom are permanently fixed, the colors varying on the same plant from year to year, and even varying on the same plant at the same time. We cannot guarantee that the amount of color in the bloom always fits the description, but we will continue to rogue those that do not eventually settle down somewhere near to type.

Phlox

Shipped April, May, and from Mid-September on.

PHLOX like a well-drained, moderately rich soil and plenty of water. Plant in spring or fall, about 18" apart, in soil prepared and enriched deeply. They will thrive in full sun or partial shade. To check mildew dust with sulphur in the morning when the dew is on them. For red spiders which suck the juices from the leaves and turn them brown, spray under side of leaves with any preparation recommended by your local seed store for red spiders.

Tall Bearded Iris Collection

Ten tall Bearded Iris, nice range of color in good varieties, our selection and unlabeled, for \$2.00.

Hardy Chrysanthemums

CHRYSANTHEMUMS should be planted in the spring after danger of frost is over. They like a loose, mellow soil with plenty of humus. A side dressing of commercial fertilizer after they are well established and again in August, worked into the soil, will do much to enhance the quality of bloom. They should not be allowed to get too dry if you want a good showing. After the plants reach a height of about 6 inches, pinch out the tip to induce branching and produce a stockier plant. When lateral branches grow 6 inches, they too should be pinched. No pinching should be done after mid-July.

For spring shipment, April and May only. Plants started in 2 1/4" peat pots. Each 50¢; 3 of one variety \$1.25; 12 of one variety \$4.50.

BIRETTA. Brilliant cardinal red; many double blooms and early.

BLUSHWHITE. Midseason white spoon with a faint lavender cast.

EARLY KATHLEEN. Early and gay, of a bright coppery bronze.

FRED STONE. Large, brilliant dark red; midseason and semi-double.

HILITE. Fine early double light yellow, on long stems for cutting.

JOHN FURST. Tall, vigorous plants; blooms bright glistening orange; very showy.

LADY'S CHOICE. Large, flat double blooms of truly pastel ivory coral.

LEE POWELL. Tall, large and lovely double midseason; deep yellow, somewhat bronzed.

MALINDA BROWN. Early, double and somewhat incurved, lavender-rose.

NEW DRIFTED SNOW. Fine, spready plants, 3" fluffy white blooms.

OLIVE LONGLAND. Large apricot-toned salmon, midseason double.

ORCHID HELEN. Early and very hardy. Bushy plants literally covered with pink-orchid blooms.

REFLECTION. Early and double; many blooms of lovely deep rose.

VICTOR RIES. Salmon, overlaid bronze gold, large frost-resistant blooms.

WHITE TOWER. Tall plants with many ball-shaped poms of pure white; fine for cutting.

THE CUSHION AND LOW GROWING CHRYSANTHEMUMS

For spring shipment, April and May only. Plants started in 2 1/4" peat pots. Each 50¢; 3 of one variety \$1.25; 12 of one variety \$4.50.

- CAMEO. Low growing and perfectly rounded plants covered early with lovely pink blooms.
- COQUETTE. Early blooming very compact cushion with many blooms of rose-pink.
- EARLY GOLD. Very nice bright gold poms blooming over a long season; dark, healthy foliage.
- EDNA ROWLEY. Large, rounded mounds, covered with lavender-pink ruby-eyed buttons.
- EARLY ROBIN. Not a cushion, but low bushes covered early with bronzy blooms with red centers.
- JOYOUS. Cushioned plants covered with many blooms of grenadine pink.
- LEMON DROPS. Compact, neat mounds, covered with the blooms of clear, light lemon yellow.
- LIPSTICK. Very floriferous and bright, a flashy strawberry red.
- NANOOK. Neat mounds of white for early bloom. The best white cushion.
- POWDER PUFF. Very compact plants, covered with blooms of quilly cream white.
- RED GLEAM. Low, spready plants covered early with blooms of bright crimson red.
- ROUGE CUSHION. Early and semi-double; very brilliant red on low plants.
- RUBY MOUND. Very dwarf mounds with small poms of deep ruby red.
- TRINKET. Rather large mounds covered with rose buttons with darker centers.
- TWINKLE. Midseason double blooms of fuchsia-purple on compact plants.

ENGLERTH SEEDLING

Daylily Seedlings

We grow thousands of seedlings, and sell many here from the garden at \$1.00 each-- lovely daylilies that we have lined out for further hybridizing but that are too near alike for them all to be named. Many of our garden visitors prefer them to named varieties. They run through all the shades of yellow and melon, deep gold to orange, with some pink and red. We will send you five of these, our selection, for \$4.00, or ten for \$7.50.

GARDEN NOTES

To lengthen the bloom season of a phlox clump, pinch the top out of two or three stalks on the front, where there are several stalks, and when they are about half grown. The ones pinched will branch out and bloom later and some shorter than the stalks at the back, thus making for longer color in that particular spot.

Echinops Taplow Blue is very effective with clumps of yellow daylilies, and white daisies help to complete the picture. For a touch of pink the lighter shades of monarda and phlox will help to liven the planting.

Blue, being the sky color, gives distance to your view. If you want your garden to appear longer or have more depth, plant plenty of blue flowers, along with pastels, at the end of your vista. Strong colors bring themselves right up to you, so they should be planted closer to the beholder.
